

HAND PRINT THANKSGIVING WREATH

This is an easy craft to make, but will look beautiful hanging on your front door, or bedroom door, in your kitchen, or on your Thanksgiving table!

Use some construction paper – in fall colours – to make this wreath. Just trace around your hand, and cut out the handprints – or ask an adult to do it – and then tape or glue them together. Then you can print something your thankful for on each hand! If you have permission, you can tape it to a door, or you can put two small holes in the hands at the top, and hand it up using some ribbon.

HAPPY THANKSGIVING!
